

Monthly Shipping Overview October 2017

Cardinal
Marine

BSPA 5 yr Index

S&P activity in the tanker sector saw some interest from buyers this month. In the Crude segment, VLCC “**GENER8 ZEUS**” (318k Dwt, 2010, Korea) was sold to U.S. based buyers at about US\$53.0 million. Suezmax “**GENER8 ARGUS**” (159k Dwt, Korea, 2000) was sold at about US\$11.0 million levels. Aframax “**LR ALDEBARAN**” (109K Dwt, 2007, China) was reported sold in region US\$15.8 million. In the MR tanker segment “**CHALLENGE PEARL**” (47k, Dwt 2008, Japan) was sold at mid US\$16’s million to Irish buyers. In the Chemical tanker segment, “**ARABIAN ORCHID**” (19k Dwt, 2007, Japan, Stainless steel tanks) was committed at about US\$14.0 million.

In dry bulk S&P, the buying spree continues. In the Cape segment, “**CHOULLY**” (182k Dwt, 2016, Japan) was sold at high \$44’s million. “**CAPE TRIUMPH**” (176 Dwt, 2016, Japan) was sold to Chinese buyers at about US\$45.0 million. Asian buyers acquired 2015 built Kamsarmax “**SBI RUMBA**” (84K Dwt, Japan) at about US\$19.6 million. In the Panamax segment “**CHENGYANG EMINENCE**” (76k Dwt, 2013, China) were sold at about US\$16.5 million. Supramax “**NANDINI**” (56k Dwt, 2007, Japan) was committed at about US\$12.0 million. In the handy segment, “**GALENE M**” (33k Dwt, 2011, China) was sold at mid US\$12’s million.

This month in demolition market, cash buyers and ship breakers remained engaged in securing tonnage during and post festive season in India. Price levels subcontinent remained stable across subcontinent. However, as supply of suitable units dwindles owing to increased freights in the dry bulk sector, we can expect to see an increase in price levels for the remaining of the year.

Southeast Asia and India are set to pick up the slack and drive global coal demand through 2040 as China cuts use of the fossil fuel to fight pollution, forecasts from the International Energy Agency and Wood Mackenzie show.

India and Southeast Asia will account for the bulk of increased coal use in the decades ahead as they rely on one of the cheapest sources of power to supply electricity, although pollution concerns have delayed some projects.

As per the IEA, Some 100 gigawatts (GW) of new coal-fired capacity is expected to be built in Southeast Asia by 2040, boosting the total installed capacity to 160 GW. Forty percent of the new capacity will be in Indonesia,

Southeast Asia will become a net coal importer by 2040 as production slips to about 375 million tonnes of coal equivalent (mtce), while demand rises 3.7 percent yearly to 387 mtce, the agency said. Imports into South Asia, which includes India, Bangladesh and Pakistan, will rise to 284 million tonnes, up 72 percent during the same period

(Source: Reuters)

Oil prices dipped towards the last week of the month after the United States reported record crude exports, although traders said that efforts led by OPEC and Russia to cut production meant markets remained well supported overall.

The declines came after the Energy Information Administration (EIA) said late on Wednesday that U.S. crude oil exports jumped to 1.98 million barrels per day (bpd) last week, surpassing the 1.5 million bpd record set the previous week.

The increase has been triggered by the wide spread between U.S. WTI and international Brent crude prices, which makes U.S. oil exports attractive.

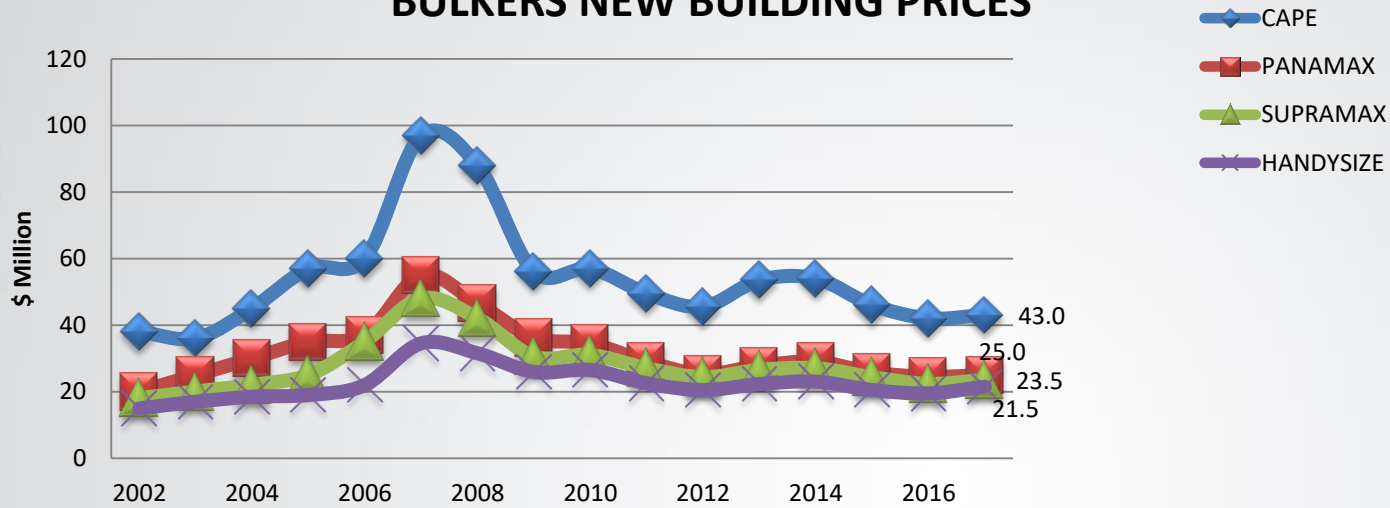

Some traders said this was also an indicator that markets remained amply supplied despite efforts led by the Organization of the Petroleum Exporting Countries (OPEC) and Russia to cut output to tighten the market and prop up prices.

But analysts said that oil prices were unlikely to fall much further.
